
AN ENTIRELY NEW LINE OF DISSTON HAND SAWS

GREATER beauty . . . new designs.

Lighter weight. Narrower blades. Thinner backs.

Every saw finer than ever before!

A new high polish on every blade, more beautiful. Handles of improved design, with a new weatherproof finish.

Disston true-taper grinding gives perfect balance. Easier, faster cutting.

Thinner blades, with the proper stiffness, for modern sawing.

New opportunities for saw sales.

Every saw a masterpiece, worthy to bear this signature:

Henry Disston

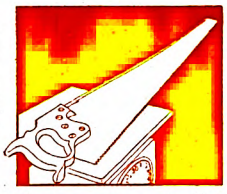
NEW IN EVERY

LIGHTER BLADES



Disston skill and experience have produced a thinner blade, for easier, faster cutting.

The Disston true-taper grinding removes all unnecessary weight, without making the saw limber.

Disston now makes saws narrower, thinner, lighter, to suit the mechanic's present needs.

Saws with tough temper, proper stiffness, perfect tension and balance, but with less weight.

NARROWER BLADES

The narrower blades, with the Disston true-taper grind, save the users' strength at every stroke.

They cut faster, run smoother, and have better balance.

There is no strain on the wrist, no drag on the arm. Every blade "follows through", as never a hand saw could before. The user feels the difference at once.

The teeth are shaped to take hold better, bite deeper, and retain their keen edges longer.

TRUE-TAPER GRIND

Accuracy in grinding always has been a feature of Disston Hand Saws.

The Disston true-taper grind has been improved to give still better clearance, better balance, and easier cutting.

This true-taper grind graduates uniformly from the cutting edge to the back and from the handle to the point. The tooth edge is of even thickness from end to end.

HIGHER POLISH

Every Disston Hand Saw is given a higher polish, a finer finish, than ever before. This finish is rich, lustrous, *beautiful*. It reflects the superiority of the Disston Steel from which these saws are made.

The user will realize, more than ever, the importance of the words etched on the blade:

"For Beauty, Finish, and Utility this Saw cannot be excelled."

STRIPED BACKS ON ALL SAWS

A "Line of Beauty", at the back of the blade adds to the fine appearance of every number in the new Disston Line.

This beauty line, often called "striping", is an attractive feature, contrasting in tone with the finish of the rest of the blade.

The nib or bead has been removed from all straight-back saws. These now have striped backs.

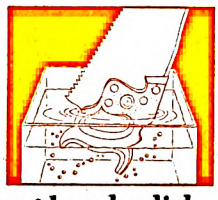
NEW HANDLE DESIGNS

Every Disston Hand Saw now has a covered-top handle, invented by Disston. The covered top adds beauty and strength to the handle, in which the blade has triple anchorage.

Hand-holes are larger, for a more comfortable grip. The user can choose the blade he likes, with style of handle he prefers.

Each blade is let into the handle the proper distance to give perfect balance.

WEATHERPROOF FINISH HANDLES



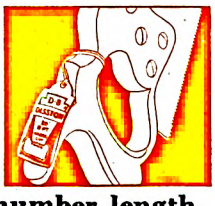
Disston Hand Saws all have handles with weather proof finish, more beautiful and far more durable than the finest hand polish.

The new finish is weatherproof, permanent, tried and proved. A two years' test exposure outdoors did not affect it.

This finish seals the pores of the wood and prevents warping.

CARVING—Hand carved designs have been improved, in keeping with finer finish of handles.

NEW HANDLE TAG



As a new service to the hardware trade, an attractive tag, in colors, is attached to the handle of each saw. It gives the number, length, point and style, with space for retail price. You need not take a saw from your display to tell if it is cross-cut or rip or get other information.

Inside the tag are facts about saws and tools, of interest to the consumer, written to help increase your sales.

BETTER BOXES-NEW LABELS

The new Disston Hand Saws come to you in stronger boxes, sealed with tape instead of tied.

The sealed package brings the saws to you exactly as they left the factory. Labels, in Disston orange and black, on end and side of box, show quantity, grade, size, point, and whether rip, hand or panel.

D-15, D-115, D-17, and D-120 are packed 1/6 dozen in box; all others, 1/3 dozen in box.

Beautiful

FEATURE

THIN, YET STIFF

The thinner a saw blade is, if it is stiff, the better it cuts and the easier it is to use. Every new Disston Saw is thin, yet stiff. Each has the correct temper to make it keen and the true taper to make it run easy and cut fast.

In the new Disston Saw, your customers get a thin, light blade, stiff and sturdy, with Disston true-taper grinding—the modern saw for present-day sawing.

BEAUTY such as never was put into hand saws before!

New beauty, not only in finish, but new beauty in design and workmanship.

Every saw in the new Disston line is a masterpiece of saw-making; every one reflects the utmost skill of generations of able craftsmen.

And new sales opportunities—*now*—await all who stock and display Disston Hand Saws.

LIGHTWEIGHT SAWS

FEATURED IN THE NEW DISSTON LINE

EACH saw in the new Disston line replaces the saw of the corresponding number of the previous line. D-8 remains D-8, etc. The Disston "D" now precedes all numbers on the etchings of the saws; No. 7 and No. 12 become D-7 and D-12.

Lightweight (ship pattern) saws are featured.

All saws, including regular patterns, are made narrow and light. They have thinner backs, with the Disston true-taper grind.

All saws have the new high polish, with weatherproof finish handles; striped backs, and improved hang and balance. Better service for the user: more sales for you.

D-8: New finish, beauty and arrangement of the screws. Disston true-taper grind.

D-8 Lightweight: Disston true-taper grind. New finish, beauty and arrangement of screws.

D-7: Pattern of handle changed, improving balance. New finish, more beautiful. Disston true-taper grind.

D-7 Lightweight: Pattern of handle changed, improving balance. New finish, greater beauty. Disston true-taper grind.

D-115: The finest hand saw in the world. Carved rosewood handle with nickel-plated screws. Disston true-taper grind.

D-15 Lightweight: Pattern of rosewood handle improved, with new grip, new carving, nickel-plated screws. More beautiful. Disston true-taper grind.

D-12: Blade made narrower. Pattern of handle changed, improving balance. Five nickel-plated screws. New beauty. Disston true-taper grind.

D-12 Lightweight: Pattern of handle changed, improving balance. Five nickel-plated screws. More beautiful. Has Disston true-taper grind.

D-112: Blade made narrower. Pattern of handle changed, improving balance. Five nickel-plated screws. Disston true-taper grind. Greater beauty.

D-23: Pattern of handle improved, with new grip, roomy and comfortable. Disston true-taper grind. More beauty.

D-20: Pattern of handle improved, with larger hand-hole and new grip. Greater beauty. Disston true-taper grind.

D-17: Blade made narrower. Pattern of handle improved. New finish. More beautiful. Disston true-taper grind.

D-16: Blade made narrower. Pattern of handle changed, improving balance. Five screws. New finish; greater beauty. Disston true-taper grind.

D-16 Lightweight: Pattern of handle improved. Five screws. New finish and new beauty. Disston true-taper grind.

D-120: Blade made narrower. Shape of teeth changed; easier to file. Five nickel-plated screws. Hollow-ground for clearance. More beautiful.

The new Disston Hand Saw Line presents new opportunities for profits to the hardware merchant. "He profits most who serves best", and the retailer who sells his customers DISSTON Saws is rendering them a lasting service.
